

CHAPTER – 1

INTRODUCTION

1.1 Introduction

The project ‘TOURCHALO’ is a website that is concerned with providing different tour packages and holiday packages to the client with and integrated video section that is a stand-alone application to provide a better client and vendor experience. The website provide a huge variety of tour packages with a focus on the packages not in the main stream commercial tour business like pilgrimage packages, sacred travel packages and destination tour packages with different variations.

The website focus on indirectly connecting client and vendor and generating a trust for the services. Tourism is a growing industry in India because of the rising middle class and there is a lot of potential in tourism business, this website provide an opportunity to both vendor and client to have their wants satisfied. The website consists of lot of functionality that include looking for packages and making a booking, understanding a destination and getting information about it. An user login for the website create an account upload a video or share an URL for the Youtube link for the video. Then there is an admin panel where the administrator can perform all the operations that are provided with the website which include adding CRUD (create, read, update, delete) functionality for video, category, comment and user. This website is capable of doing or performing following tasks:-

1. Registration.
2. Login.
3. Video streaming.
4. Getting queries for a package.
5. Uploading video (both Upload and Youtube URL).
6. User Profile.
7. Updating user Profile
8. Comment on Video
9. Control over Comments
10. Control over Categories of video
11. Admin Panel

This website is developed keeping all the aspect of tourism industry in mind with different experiments and surveys. This website is intended to be developed for a complete experience for a client and to enhance the amount of booking of tour packages. The user experience is the top most priority the website is solemnly focused on enhancing the user experience and in delivering what is promised.

MySQL database management system is used as “Backend” which is capable of recording information and PHP is used as the server side scripting language. JavaScript, CSS3 and HTML5 is used for representing the desired functionality to the user as ‘Frontend’. The database is capable of doing following operations:

Keeping records of various user.

Keeping records of different videos.

Keeping records of comments.

Executing query to provide desired output

This website provide a sophisticated feature of uploading a video and URL both thus enhancing the reach of the website and also making it more user friendly for the clients who are there as vendors.

There is an admin panel in the website which enhances the functionality of the website even further by providing the user the right to control which video is going to be published on the website, Which comment is not appropriate and should be deleted, Which category of video to introduce as the website grows and also the functionality of adding and updating the video by the admin if they desire.

The user section consists of a user registration, login, profile, video upload, comment deletion, user update, changing information, and updating videos.

All these feature makes this website fully functional for a business related to tour and travellers but with a lot of future scope and possibilities.

1.2 Necessity

In today's world of technology every business is using information technology to expand its reach and for that there are many mediums and ways. So is the tourism industry but there is a lot of trust issue when it comes to delivering what promised. One such section of tourism is the most revenue generating category of pilgrimage Tours and sacred tours.

India is the country famous for its pilgrimage and holiness, with lots of religious and cultural diversity but when it comes to pilgrimage tours there are lot of trust issues between the client and the vendors resulting in lot of chaos and loss of business.

This website is there to provide a bridge between the vendors and to clients but providing them a platform to represent themselves and to enhance their profits and Market.

This number of complaints of different destination tours and pilgrimage like tours are increasing day by day to sole reason is the increase in expectation of the client and inefficient delivery of information. TourChalo is thus developed to provide efficient information delivery in form of pictures, itineraries, customer reviews and videos.

The different aspects which were considered in-order to develop this project can be listed as follows:-

- Enhance awareness about tours like pilgrimage, health etc.
- Effective information delivery
- Platform to represent the kind of available services
- Increasing the sales
- Connect client and vendor
- Increasing the lead generation for the website
- Increasing the

In order to provide these facilities the website TourChalo was developed. This website is developed to provide opportunities to both client and vendor. These problems where always there and people were suffering from them as solving problem is what we are taught these problems led to development of the website and this project which provides a complete solution to the above problems and makes it easier for the clients to choose what they really want and to make an appropriate choice.

1.3 OBJECTIVES:

The website Tourchalo is developed to provide the a better environment to the client and vendors for both sell and purchase of tour packages but when we say environment there are lot of things that comes into consideration. The website is required to display the different tour packages and provide necessary details to the client. It should be provided with the functionality of enhancing the size of the website as and when required. The design should be well suited for commercial package selling.

The website must be able to get as many leads as possible and to collect the date of as many visitors as possible, the website must be well integrated with the video section which should be stand-alone in order to provide greater scope and functionality to the website.

In order to achieve the above described functionality the several objective of the project can be breakdown as follows:-

- Develop Section to display several tour packages.
- Each Package/Destination should be equipped with its own separate section.
- Building a video section to display videos related to the website.
- Develop an Admin panel.
- Integration of video section with the tour packages.
- Increasing the functionality provided to the administrator of the website.
- Enhance to user interaction with the website.

The above objectives are taken care while doing the project and to provide a website with the required functionality and usage for both client and the vendor. The website is to promote the sales for different packages and to create awareness about them. The soul focus of the website is to revolutionize the way tour packages are sold in India and the world and to create a trust bond between the client and user to enhance their experience about travelling and touring different destinations throughout India and later to the whole world.

Accomplishment of the above objectives is the soul aim of this project in order to make it a success and to deliver the solution to the problem related to the tour and travel industry in Indian and all over the world.

1.4 THEME:

Tourism is a booming industry in India due to increasing middle class and rise in the income of a family to due increased work force. The project Tourchalo is facilitate the clients in choosing the right package according to their needs. The website provides a completely different approach to how tour packages are sold in current scenario. This website not only do the traditional stuff of providing information and booking tour but it also provide a complete and unbiased information about the tour packages in the form of videos that give the client a completely different experience to when it comes to tour packages booking.

The website consists of a landing page that gives all the relevant information and an overall outlook of different tour packages available along with a video section that provide related videos and advice about tourism related topics. On selecting a package/destination the client is directed to the individual page for the destination/package. This individual tour package/destination page consists of the complete information about the package and what all are the requirement and other stuff required for the package. Also it consists of a book now link that provides the client the functionality of booking the package directly without any assistance form the customer care unlike the other website's that are there in the business.

This website consists of a video section that provides a platform for different vendors to get connected to the clients and introduce the services and comfort that is provided directly and in an efficient way. The video section includes user login/register that helps both the client and the vendor to post, comment and represent themselves, a profile page with all the relevant information about them. The user has the facility to create, update, and delete the information related to a post and comment that is there on the video uploaded by them also the user can delete the complete video. The login option uses PHP session to enhance the user experience and to provide a more secure and functional video section to the user.

An important aspect of the website is that the user is provided with the option to upload a video or provide a youtube link for the video the website represent both the videos is the same manner and with same functionality.

The website also consists of an admin panel that increase the administrator ease and control over the website providing functionalities like adding, updating, deleting videos

for the website. The administrator can work with comments and categories in the same way as the videos. He can delete categories, add new categories, update categories and view the different categories available with the website. The same functionality can be performed with the user attribute by the admin. An admin can view all the users, change their status delete their account. The comments are also associated with each video providing better feedback and the user and the admin both can view and delete comments on the video that is associated with user however the admin is provided with all the comments and can use its power on any comment on the website.

Tourchalo is combination of a tourism website with a online video streaming portals like Youtube, which helps the conversion of visitors to leads and then finally to a potential buyer. The website focus on getting as much information as it can take in order to use it for future use to target a specific audience for a specific destination. Attractive representation and simple representation of information and details is what makes this website a user friendly and likable website with every functionality that is needed by the client.

The interrelation of different pages in the website are organised in such a way that it provide users a smooth transition from one page to another and hence increasing the user experience which ultimately increases the sales for the company. The website is a good example of both how to use static content and how to develop dynamic content with the information in the database. Whole of the video section is represented with the help of the content coming out of the database and the package section is created using static content which all together increase the usability and management of the website easy and smooth and thus making it a more usable website.

This website is a perfect example of how we can integrate good ingredients and create a better dish to match our taste. The video section is the best example of this as it not only facilitate the developer to get more traffic but also convert that traffic to the ultimate goal which is to increase the business of the company and make more and more profit out of the website. The options available with the user and the admin is what makes this project wonderful and a ready to earn kind of thing in the market of tourism and travel. This website represent a vast variety of scope and functionality and thus is very useful for both the normal user who simply wants to travel and also a vendor who wants to make the travel for a normal user an experience worth remembering.

1.5 ORGANIZATION

ENTERWEB INFOSOFT

Mail Us: info@enterwebinfosoft.com

Website: www.enterwebinfosoft.com

1.5.1 INTRODUCTION:

Enterweb Infosoft has been founded by group of senior IT Professional. Right from the inception of this start up, it has prospered by Leaps and bounds in technology products and critical solutions. Enterweb Infosoft established back in December, 2015 at Allahabad, India to serve the varying need of individuals as well as SMEs in today's competitive market across the globe.

As of year 2019, Enterweb Infosot has a strong team of more than 40 members in Allahabad, India lead by passionate young entrepreneurs serving customers from across the globe. It is continuously increasing its reach with potential customers and determined to expand its services to more and more people throughout the world. It embrace its responsibility to create a positive impact in the communities in which it provide its services. Enterweb Infosoft brings robust skills and forward looking perspectives to solve customer challenges. It uses proven knowledge to make recommendations and provide expert guidance to its customers.

1.5.2 Mission & Vision:

Its Mission is to establish itself as renowned brand in the field of IT services and to be the world's leading IT Channel in products, services and solutions that empower and alchemize the way consumers and businesses assemble, manage, distribute and communicate information.

Our vision is to create product that actually helps people and bring changes to the life of individual and to become a world-class software development and technology. Providing client with best possible solutions and services is what the company ought to. It also helps start-ups to implement their ideas to real world applications.

1.5.2 Achievements:

Enterweb Infosoft is well known in the region and the area around for providing best services related to website development and digital marketing service provider. The company is also believes in Quality and it is evident from various technology breaks through like in recent successful organization of Divya Kumbh for the biggest gathering in the world Kumbh mela providing services to both local and foreign clients and doing online promotion of more than 8 candidates for the recent Lok Sabha elections . Our achievements represent our capabilities and expertise in catering directly to the problematic area of a business enterprise.

Enterweb Infosoft works along with the client to improve its business outcomes by exploring new business opportunities, deriving cost takeout, and increasing process efficiency without any major change. From innovative ideas to their implementation and thereafter, Enterweb Infosoft offers all business transformation outsourcing services to clients under one flagship in four different phases of consulting, developing, outsourcing and training.

1.5.4 Services We Offer:

- I. Consulting:** Enterweb Infosoft has 360-degree approach including each business process through a panel of various domain experts, who work hard along with the client to identify the requirements to achieve client's goal while respecting its value. It has devised ready to opt industry vertical consulting solutions for various processes like Business Case Analysis, Management product, Development and Management, IT Strategy Formulation, Technology Support Development, Internal Marketing, Product Testing, Performance Management etc.
- II. Development:** Enterweb Infosoft has the honour of developing innovative technologies and the growth of cloud, mobile computing and

social media have put additional burdens on staff looking to quickly provide modern solutions. We also offer bouquet of various enterprise solutions, Android applications, Desktop applications, Web & Device Applications.

- III. Outsourcing:** Besides various readymade Enterweb infosoft business process outsourcing solutions for various processes like collocation services, Onsite Database Administration Services, Online Counter etc., we have specialization in various industrial critical, technical and general processes. Our man resources are trained for client processes and work as client's integral part and are fully accessible by client directly.
- IV. Digital Marketing:** The Company provide digital marketing services to the clients which includes brand promotion, getting the domain to top position in the search results by bookmarking, posting content, on-page and off-page search engine optimization etc. for clients so that they can get results of their effort faster and get their business moving quickly. .
- V. Industrial Training:** From corporate training to end user training and technical Trainings, the company provide training to those individuals who want to make their careers in the field of information technology, computer networking, marketing etc.

CHAPTER 2

LITERATURE SURVEY

Tourism industry has seen an exponential growth in recent time in India due to increase in the growing population of the middle class and the living standard of the people in the country and thus has a lot of potential when it comes to business. Tour and travel packages are becoming common, every family plans a holiday at least once a year, which provide lots of opportunities to make a business out of this.

Most of the websites and agencies that are there provide information to a selected group of destinations and that too with incomplete information. There are lot of cases where customer is not satisfied with the services offered in return to the promises made by the tour provider.

According to World Travel and Tourism Council, India will be the one of the most hot-spot for tourism from the year 2009 to 2018, having the highest 10-year growth potential. Pilgrimage tours and sacred travel tours are the most untrusted tours when it comes to the service that the local vendors promises. Every global website is dependent of the local vendors for providing the services.

Customers are increasing market is increasing but the trust of people on these tours have gone down, an increase in the population of people who don't want to go for the tour again. This result both in loss of the market and the reputation of the country and the destination itself.

Customers are most of the times unaware of the local conditions and thus fall prey to the cheap tricks of the local vendors costing them a lot of money which was otherwise unnecessary.

India is a country with huge cultural and religious heritage, there are lot of places to visit, explore but there are not much options when it comes to pilgrimage tours in India. A select group of places is available and most of the time customer don't get what he is looking for or the best that he can get.

2.1 EXISTING SYSTEM:

In the existing system the different websites and travel agencies depends only on the information given by the local vendors and there are not lot of options available when it comes to pilgrimage tours and the destinations. Local vendor is the king when it comes to

deciding services being offered to the customer. Which results in a unsatisfied customers and an decrease in the business.

Disadvantages of the existing system:

1. Unsatisfied customer.
2. Unnecessary increase in expenditure in return of services offered.
3. Unavailability of integrated payment option when it comes to pilgrimage packages.
4. Lack of support group.
5. Unavailability of a platform for sharing experiences and the exact information about the tour package and holiday experience.
6. Less number of available choices.

2.2 PROPOSED SYSTEM

To solve existing system drawbacks, we develop a website that focuses on covering the destination less focused by other website and vendors with a platform which allow online video streaming and comment section to insure the customer gets what he is promised while buying the package.

Online payment method to buy the package without wasting time interacting with the sells executive. The video platform provide a complete stand-alone platform that can be used to for other promotional activities.

Benefits of Tourchalo

The benefit of Tourchalo is that it provides a website is equipped with all the necessary functionality of a tourism website. It provides online payment option which most of the pilgrimage tour provider don't provide. The website is also equipped with an online video streaming platform which results in increased reliability of the services that are promised at the time of booking a package for a tour or destination.

There is a video module that provide clients and the vendor to connect and share information that is relevant in both ensuring the promised services and enabling the user to select the package according to their interest in the subject and destination.

The website is also a great resource in order to get to know a destination and the kind services that are offered along with the preparations that are required before going on a tour. The advice of someone who has experienced the situation results in a greater impact and thus increasing the trust of the people concerned with the issue, this website is a great platform for this and a superb option for setting up public opinion.

The different advantages that the services provided by this website offer can be listed as follows:

- 1. Better options with pilgrimage tours and destinations.**
- 2. Easy online transaction in order to book a package.**
- 3. A video platform for better exchange of information.**
- 4. Increase in a vendor's reach for an audience.**
- 5. Insuring proper services in exchange of money.**
- 6. Selection of proper product according to the need.**
- 7. Increase in user involvement with the platform.**
- 8. Increasing the accessibility by sharing information.**
- 9. Make the selection process easy and interesting.**
- 10. Better management of information through admin panel.**

Thus the website is a great platform for those who want to enjoy their holiday and have fun while travelling and visiting amazing destinations in the country and the world. The website is great at delivering what it promises to the user and making their experience an experience worth remembering and sharing.

CHAPTER 3

TRAINING WORK

3.1 TECHNOLOGY USED

3.1.1 HTML 5:

Hypertext Markup Language (HTML) is the standard markup language for creating webpages and web applications. With Cascading Style Sheets (CSS) and JavaScript, it forms a triad of cornerstone technologies for the World Wide Web. Web browsers receive HTML documents from a web server or from local storage and render the documents into multimedia web pages. HTML describes the structure of a webpage semantically and originally included cues for the appearance of the document. HTML can embed programs written in a scripting language such as JavaScript, which affects the behaviour and content of web pages. Inclusion of CSS defines the look and layout of content.

The World Wide Web Consortium (W3C), maintainer of both the HTML and the CSS standards, has encouraged the use of CSS over explicit presentational HTML since 1997.

3.1.2 CSS 3:

Cascading Style Sheets (CSS) is a style sheet language used for describing the presentation of a document written in a markup language like HTML.

CSS is designed to enable the separation of presentation and content, including layout, colors, and fonts. This separation can improve content accessibility, provide more flexibility and control in the specification of presentation characteristics, enable multiple web pages to share formatting by specifying the relevant CSS in a separate .CSS file, and reduce complexity and repetition in the structural content. Separation of formatting and content also makes it feasible to present the same markup page in different styles for different rendering methods, such as on-screen, in print, by voice (via speech based Browser or screen reader), and on Braille-based tactile devices. CSS also has rules for alternate formatting if the content is accessed on a mobile device.

The CSS specifications are maintained by the World Wide Web Consortium (W3C). Internet media type (MIME type) text/CSS is registered for use with CSS by RFC 2318 (March 1998). The W3C operates a free CSS validation service for CSS documents.

3.1.3 JavaScript:

JavaScript is high-level, interpreted programming language. It is a language which is also characterized as dynamic, weakly typed, prototype-based and multi-paradigm. Alongside HTML and CSS, JavaScript is one of the three core technologies of the World Wide Web. JavaScript enables interactive web pages and thus is an essential part of web applications. The vast majority of websites use it, and all major web browsers have a dedicated JavaScript engine to execute it. As a multi-paradigm language, JavaScript supports event-driven, functional, and imperative (including object-oriented and prototype-based) programming styles. It has an API for working with text, arrays, dates, regular expressions, and basic manipulation of the DOM, but the language itself does not include any I/O, such as networking, storage, or graphics facilities, relying for these upon the host environment in which it is embedded. Initially only implemented client-side in web browsers, JavaScript engines are now embedded in many other types of host software, including server-side in web servers and databases, and in non-web programs such as word processors and PDF software, and in runtime environments that make JavaScript available for writing mobile and desktop applications, including desktop widgets.

3.1.4 PHP

Hypertext Pre-processor (or simply **PHP**) is a server-side scripting language designed for web development but also used as a general-purpose programming language. It was originally created by Rasmus Lerdorf in 1994, the PHP reference implementation is now produced by The PHP Group. PHP originally stood for *Personal Home Page*, but it now stands for the recursive acronym *PHP: Hypertext Pre-processor*.

PHP code may be embedded into HTML code, or it can be used in combination with various web template systems, web content management systems, and web frameworks. PHP code is usually processed by a PHP interpreter implemented as a module in the web server or as a Common Gateway Interface (CGI) executable. The web server combines the results of the interpreted and executed PHP code, which may be any type of data, including images, with the generated webpage. PHP code may also be executed with a command-line interface (CLI) and can be used to implement standalone graphical applications. The standard PHP interpreter, powered by the Zend Engine, is free software released under the PHP License. PHP has been widely ported and can be deployed on most web servers on almost every operating system and platform, free of charge. The PHP language evolved without a written formal specification or standard until 2014, leaving the canonical PHP interpreter as a *de facto* standard. Since 2014 work has gone on to create a formal PHP specification.

3.1.5 MySQL:

Backend:

MySQL is a database system used on the web. It is a database system that runs on a server. It is ideal for both small and large applications. It is very fast, reliable, and easy to use. It uses standard SQL. It compiles on a number of platforms. It is free to download and use. It is developed, distributed, and supported by Oracle Corporation.

The data in a MySQL database are stored in tables. A table is a collection of related data, and it consists of columns and rows.

Administrative tool phpMyAdmin is user to manage data used in the project. It is a free and open source administrative tool for MySQL and MariaDB. As a portable web application written primarily in PHP. It has become one of the most popular MySQL administration tools, especially for web hosting services.

3.2 Reason for selection of particular languages

An Internet presence has become a necessity to enhance the business these days and not only business online presence is the need of your generation. The reason for selecting PHP and related technologies for my training is that they equip us to have this online presence in the form of websites or blogs on different blogging websites like the Bloggers.com and many other.

With the advancement in the networking world and technology Internet has become an integral part of our day to day life and thus it is necessary to know how to have influence over the internet and in order to have that one must be aware of who to develop and design content that can be viewed by others over the Internet.

I have already prepared my 6 week training project which was a website using Java and what I realised is that in order to prepare a website you should have the basic knowledge of web designing and PHP is much faster to develop and PHP tends to have fewer issues when using shared hosting which is mostly used by individuals and small businesses.

PHP development has a huge market when it comes to website development. Lot of people want PHP code and there is demand for PHP developer in the website development world, job opportunities are better and there is lot of things that you can work on.

These were the reason why I choose the specified language for my training.

The web browser is one of the most used applications on both desktop and mobile devices. With more and more services moving to the web, JavaScript will only increase in popularity, and as a whole there is a lot of technical innovation going on on JavaScript. Many developers and businesses have used JavaScript to extend their web products outside of the browser, which means JavaScript can be used build simple desktop and mobile apps.

The reason for choosing MYSQL as my database is that it is ideal for both small and large applications. It is very fast, reliable, and easy to use. It uses standard SQL. It compiles on a number of platforms. It is free to download and use. It is developed, distributed, and supported by Oracle Corporation.

3.3 HARDWARE AND SOFTWARE REQUIREMENTS

3.3.1 Hardware Requirement

Processor : Pentium Quad Core or above

Processor Speed	:	3.00 GHz CPU
RAM	:	2 GB or above
Hard disk utilization	:	5 GB or above

3.3.2 Software Requirement

Front End	:	A web browser (preferable – Microsoft edge)
Back End	:	MySQL Database
Application Server	:	PHP enabled webserver (preferable-XAMPP)
Operation System	:	Windows, Linux or MAC

3.4 Module

This project is composed of two major section one is the section which represents the various tour packages, provide facility to book the package and the other one is a video section that is interrelated with the packages section in order to provide a user with better service of making the user aware of what he is looking for and what is that there will be in the package.

The organization of the website can be broken down to the following major sections.

1. Packages Section
2. Video Section
3. Admin Section

Index of /tOURCEHALOProject

<u>Name</u>	<u>Last modified</u>	<u>Size</u>	<u>Description</u>
 Parent Directory		-	
 admin/	2019-05-19 04:26	-	
 packages/	2019-05-21 05:58	-	
 video/	2019-05-17 16:54	-	

Apache/2.4.38 (Win32) OpenSSL/1.1.1a PHP/7.3.2 Server at localhost Port 80

These section are further described to provide the different aspect that they deal with in order to deliver the functionality that the developer want them to deliver.

PACKAGES SECTION

The section includes the different packages and the destination that is there in the website. The section comprise of every packages and details related to that package along with all the requirements that makes a webpage efficient. Each package comprises of its own CSS files, JavaScript files, images, and related web pages. The development of each tour package involved collecting information about the packages and the doing the existing study to create the best possible page in order to get visitors on the website. This section is developed taking care of everything that is a tourism website must contain.

VIDEO SECTION

This section consist of the functionality to provide a platform for representing videos on the website. The representation of videos involves creating a whole section with different video representation page, a user profile page, a registration/login page, a video upload page, a search page and a complete dashboard for user to operate on the video section. This involved writing of database queries to get the desired output for the page.

ADMIN SECTION

This section provide the administrator of the website with the functionality to control the operation of the user. The administrator of the website can control each and every activity of user on the website which include allowing the video post by the user and controlling the comments and other functionalities on the website.

3.4.1 Division of modules

The modules on the website are divided on the basis of the section that are to be developed in the website i.e. the packages section, the video section and the administrator section.

The different modules that are used to develop the website are:-

- I. Packages**
- II. Video**
- III. Admin**

These module are used to construct an entire website with the desired functionality in the website.

3.4.2 Development of modules

The development of different modules was based on different methodology, the development of package section was based on surveys and experiment with what will attract more users. The development of video section was based on the concept that we are going to implement in order to take the video from the user and displaying it to the website and the admin module was developed with the concept of how to use, represent and modify data for the website.

3.4.2.1 Packages Module

The module consist of following pages:

1. Landing page/ home page
2. Packages page
3. About page
4. Registration page
5. Book now page
6. Support page
7. Testimonial page

There are several destinations and packages that are having their own section with package categories and destination options.

The different destinations and the different packages that are included in the package section are:-

1. Char dham yatra packages
 - 1.1 Char dham-EX-Delhi package (12 days/11 night)
 - 1.2 Char dham –EX- Haridwar package (9 days/ 8 night)
 - 1.3 Char dham helicopter package (2 days/1 night)
 - 1.4 Do dham helicopter package (1 day)
 - 1.5 Kedarnath – Badrinath –Ex- Delhi package (7 days/6 nights)
 - 1.6 Kedarnath – Badrinath – Ex- Haridwar package(5 days/ 4 nights)
 - 1.7 Yamunotri- Gangotri- Ex- Delhi package(5 days/ 4 nights)

2. Amarnath Yatra packages (6 integrated packages)
3. Kailash Mansarovar Yatra packages (9 integrated packages)
4. Varanasi Tour Package
5. Prayagraj Tour Package
6. Agra Tour Package
7. Dargeeling Tour Package
8. Kerala Tour Packages
9. Goa Tour Package
10. Shimla Tour Package
11. Ladakh Tour Package
12. Manali Tour Package
13. Nainital Tour Package
14. Rishikesh Tour Package

These destination and tour packages are all fully functional and can be used as a single website for targeting a specific audience and attracting them to produce profit for the company and to test the market for the potential of a destination. This facilitates to work on a particular section with greater scope and hence saves effort for the development of the website by both the developer and the designer.

This section included functionality of delivering mail and generating the booking with integrated **payment gateway Istamojo** to take payment from the user and confirming the booking for the package.

3.4.2.2 Video Module

This module provides user with a platform where the user can register, login, create a profile and post videos by two methods:

1. Uploading video as a file
2. Providing the URL of YouTube link

There is an option of commenting on the video by other users and the different pages that are created in this module include:-

1. Video page for general audience
2. Search page for search results
3. Profile page for registered user
4. Video update/upload page for registered user

5. Profile update page for the user
6. Comment page for registered user

This module is completely dynamic and pulls data out of database to represent the different sections of the module. Query is written to provide the necessary information to display on the webpage.

Session are used to insure proper functioning of the module and to provide exclusive experience to the user.

3.4.2.3 Admin Module

This module provide the admin of the website with supreme control over the website and to make sure that quality of the website is maintained.

Different functionality provided to the admin include uploading, updating, and deleting a video. Adding, updating and deleting a categories, deleting and suspending a comment, deleting and updating a user.

The different pages that were created in this module are:-

1. Admin post (view, update, and delete videos).
2. Admin create post (admin upload a video).
3. Admin category (delete, add, and update categories).
4. Admin comment (delete and update comments).
5. Admin user (delete and update users).

CHAPTER – 4

EVALUATION OF TRAINING

4.1 ANALYSIS OF TRAINING DONE

The website Tourchalo is fully functional and can be used for real world implementation. The various objectives and that were considered before the development of the website are completed by the website. It provides full functionality to the administrator and the user that were decided.

The packages section has been already tested by the online to check the kind of traffic for the destination and the payment portal that is integrated is working properly for providing a client a smooth experience.

The sessions are working properly and to insure better user experience. There is proper implementation of various task that were decided for administrator like login, create update and delete categories, upload videos, make changes to the video post and deleting a video post also allowing a post provided by the user to be shown on the website. The administrator is also able to add, delete and edit the entries for category section. The administrator also have full control over the user, the user entry can be deleted by the administrator. The comments that are posted by the user can be both updated and deleted by the administrator to insure proper content on the website.

The major tasks that administrator can perform includes:-

1. Add, view, update, and delete video posts
2. Add, view, update, and delete video categories
3. View, update, and delete user

2026 26-05-2019

Detailed Day Wise Itinerary

Day :1 Haridwar- Barkot (210kms/7-8hr) Height: 1352 MTS

Barkot via Mussoorie, enroute visit Mussoorie Lake & Kompty Fall in Mussoorie. Later drive straight to Barkot. Check into the hotel arrival in Barkot. Overnight stay at Barkot. Barkot Weather - Generally pleasant in summer, the temperature ranges from 25-30 degree Celsius, Winter: The Days are pleasantly cool but the nights are cold,temp ranges from 10 deg to 05 deg.

Day :2 Barkot- Yamunotri - Barkot [36kms drive & 6kms Trek (one side)] Height: 3235 MTS.

Early morning after breakfast (packed breakfast), drive to Jonkchatti / Phoolchatti & start trek from here to Yamunotri (6kms) (Either by walk or by horse or by Doli at own cost). After taking bath in Yamunabai Kund's warm water and having 'Darshan' of 'Yamunaji' return to Jonkchatti by trek. Later drive towards Barkot, Overnight stay at Barkot. Yamunotri Temple: Maharani Gularia of Jaipur built the temple in the 19th Century. It was destroyed twice in the present century and rebuilt again. At Yamunotri, One can cook rice by packing it in a cloth and dipping it in the hot water of the Tapti kund. Pilgrims take this cooked rice home as "Prasad". Hero near the temple "Pooja" can be offered to Divya Shila. Surya Kund: There are a Number of thermal springs near temple, which flows into numerous pools. The most important of these is Surya Kund. Divya Shila: A rock pillar, worshipped before entering the Yamunotri Temple. Yamunotri Weather - In summer the maximum temp is 18 degrees and the minimum is 10 degrees celsius. The days are pleasantly cool but the nights are cold.

Day :3 Barkot - Uttarkashi (100kms/4hr) Height: 1352 MTS.

Morning after breakfast, drive to Uttarkashi. Check into the hotel arrival in Uttarkashi. Visit Kashi Vishwanath Temple in Uttarkashi. Overnight stay at Uttarkashi. Uttarkashi: Uttarkashi is home to a number of ashrams, temples. The name of the town reflects its similarity to and location (as north of) the city of Kashi (Varanasi). Similar to Varanasi, town of Uttarkashi is also situated on the banks of River Ganga. Vishwanath temple - Vishwanath temple is one of the oldest Shiva temples in Northern India. Re-constructed in 1857 by Maharani Khaneti Devi of Tehri State in the ancient

maximum temperature during summer can go up to 20° Celsius. Summer nights can get cool with a minimum temperature of 10° Celsius. Light woolen clothes are required while visiting Gangotri during summer. Winter season is very chilly in Gangotri. Gangotri will be covered in sheets of snow during winter. Pilgrim centers remains closed throughout winter due to heavy snow falls.

Day :5 Uttarkashi - Guptkashi/Sitapur (240kms/8-9hr) Height: 1319 MTS

Morning after breakfast, drive to Guptkashi via Moolgarh & Lambgoan. Enroute you can see the beautiful river Mandakini at Tilwara. The Mandakini river comes from Kedarnath, drive alongside the river to reach Guptkashi, visit Ardh Narishwar Temple in Guptkashi. Check into the hotel arrival in Guptkashi/Sitapur/Rampur. Overnight stay at Hotel in Guptkashi/Sitapur/Rampur. Guptkashi: The name Gupt Kashi means "Hidden Benares". Mythology describes how when the Pandava brothers were searching for a glimpse of Shiva, Shivi first concealed himself at Guptkashi, but later fled from them further up the valley to Kedarnath, where the Pandavas finally got their wish fulfilled. There are more tangible connections as well-the Kedarnath pandas (priests) live in Guptkashi during the winter months, and after the Kedarnath temple closes for the winter, the image of Kedarnath passes through Gupt Kashi on its way to Ukhimath (across the valley), where it stays for the winter. Guptkashi Weather - pleasant in summer, the temperature ranges from 25-30 degree Celsius. Cold in winters

Day :6 Guptkashi/Sitapur - Kedarnath - Guptkashi/Sitapur (30kms by road & 19kms Trek one way) Height: 3384 MTS.

Morning after breakfast drive to Gaurikund, start your trek from Gaurikund to Kedarnath (by Pony / Dolifrom sonprayog or Helicopter from Guptkashi/Phata/Srisi/Sitapur) at your own cost. Visit Kedarnath Temple. After temple Darshan trek down to Gaurikund. Later, drive to Guptkashi/Sitapur. Overnight stay at Guptkashi/Sitapur. Kedarnath: The Kedarnath shrine, one of the 12 jyotirlingas of Lord Shiva, is a scenic spot situated against the backdrop of the majestic Kedarnath range. Kedar is another name of Lord Shiva. According to legend, the Pandavas after having won over the Kaurava in the Kurukshetra war, felt guilty of having killed their own brothers and sought the blessings of Lord Shiva for redemption. He eluded them repeatedly and while fleeing took refuge at Kedarnath in the form of a bull. On being followed he dived into the ground, leaving his hump on the surface. The remaining portions of Lord Shiva appeared at four other places and are worshipped there as his manifestations. The arms appeared at Tungnath, the face at Rudranath, the belly of Madhmaheshwar and his locks (hair) with head at Kalpeshwar.

Day : 6 Guptkashi/Sitapur - Kodarnath - Guptkashi/Sitapur (30kms by road & 19kms Trek one way) Height: 3384 MTS.

Morning after breakfast drive to Gaurikund, start your trek from Gaurikund to Kodarnath (by Pony / Dolifrom sonprayog or Helicopter from Guptkashi/Photo/Sirs(Sitapur) at your own cost). Visit Kodarnath Temple. After temple Darshan trek down to Gaurikund. Later, drive to Guptkashi/Sitapur. Overnight stay at Guptkashi/Sitapur. Kodarnath: The Kodarnath shrine, one of the 12 jyotirlingas of Lord Shiva, is a scenic spot situated, against the backdrop of the majestic Kedarnath range. Kedar is another name of Lord Shiva. According to legend, the Pandavas after having won over the Kaurava in the Kurukshetra war, felt guilty of having killed their own brothers and sought the blessings of Lord Shiva for redemption. He eluded them repeatedly and when fleeing took refuge at Kodarnath in the form of a bull. On being followed he dived into the ground, leaving his hump on the surface. The remaining portions of Lord Shiva appeared at four other places and are worshipped there as his manifestations. The arms appeared at Tungnath, the face at Rudranath, the belly at Madhmoheshwar and his locks (hair) with head at Kalpeshwar. Kodarnath and the four above-mentioned shrines are treated as Panch Kedar. Kedarnath Weather - Due to its high altitude the weather in Kodarnath remains cold for most part of the year. Summer here is cool and pleasant while winter is severe. During summer season the temperature varies around 20°Celsius. Light woolen wear is recommended. Winter season in Kodarnath is severa with mercury falling to as low as 0°Celsius. During this time the place experiences snowfall as well. Due to the extreme climatic conditions, this time is usually avoided by tourists.

Day : 7 Guptkashi/Sitapur - Chopta - Govindghat/Pipalkoti (160kms/5-7) Height: 3384 MTS.

After morning breakfast drive to Govindghat via Ukhimath, Chopta, Pipalkoti&Joshimath. En- route visit winter abode of Shree Kedarnath ji at Ukhimath. On arrival, check-in at the hotel for dinner & overnight stay at Govindghat. Ukhimath is small town located in Rudraprayag district.Ukhimath was the land where the wedding of Usha and Anirudh, grandson of Lord Krishna was solemnized. It is also a famous pilgrimage place and known for its ancient temples dedicated to Usha, Lord Shiva, Goddess Parvati, Anirudha and Mandhata. Utsav Doli of Lord Kedarnath and Madhya maheshwar are brought to Ukhimath during winter and worshiped for six months.its winter home of Kedarnath ji known as Omkarshwar temple. The temple also holds yearly round pujas of Lord Omkarshwar. Situated on the road connecting Guptkashi with Gopeshwar, the holy town is mainly inhabited by the priests of Kedarnath temple known as Rawals.

Day : 8 Govindghat/Pipalkoti- Badrinath (25kms/1-2hr) Height: 3133 MTS.

Morning after breakfast, drive to Badrinath. Check in to the hotel arrival in Badrinath. Pilgrims after having a bath in the Tapkund have the Darshan of Badri Vishal & Aarti in evening. Brahmaakopal is significant for Pinddan Shraddh of ancestors (Pitrus). There are other interesting sightseeing spot like Mana, Vyas Gufa, Matamorti, Charanpaduka, Bhimkund and the 'Mukh' of the Saraswati River. Just within the three kms of Badrinathjoe. Overnight stay at Badrinath. Badrinath one of the 'Ancient Four Dhams' is one of the most celebrated pilgrimage spots of the country and is situated at an elevation of 3133 meters, guarded on either side by the two mountain ranges known as Nar & Narayan with the towering Neelkanth Peak providing a splendid backdrop. This revered spot was once carpeted with wild berries. Thus the place got the name 'Badri van', meaning 'forest of berries'. Tapt Kund : Natural thermal springs on the bank of the river Alaknanda, where it is customary to bathe before entering the Badrinath temple. Mana Village : Inhabited by an Indo-Mongolian tribe, it is the last Indian village before Tibet. Vasundhara : As the name suggests, vasundhara is a magnificent water fall. This place is 5 kms from Badrinath out of which 2 kms. is motorable upto Mana. Bhim Puri : On the other side of Mana village, a massive rock forming a natural bridge, lies over the roaring Saraswati river. It presents a spectacular view of water thundering down through the narrow passage under the rock and is believed to have been placed there by Bhim, the second eldest among the five Pandava brothers. Vyas Gufa (cave) : Near Mana Village, this is a rock-cave where Ved Vyas is believed to have composed the Mahabharata and the puranic commentaries. Badrinath Weather: The average maximum temperature will be around 18° Celsius and

The screenshot shows a Microsoft Edge browser window with the title bar "Chardham-ex-hardwar X". The address bar displays "localhost/tourchalaproject/packages/HTML/chardham-yatra-landing12/tour-details-chardham-ex-hardwar.html". The page content includes a header with the "TOURCHALO" logo and navigation links for Home, Packages, About, and Contact us. The main content area contains a section titled "Day 10 Day 10: Rudraprayag - Haridwar (165kms/5-6hr)". It describes the location as the confluence of Alaknanda and Mandakini rivers, mentioning its status as a Hindu holy town and its spiritual significance. Below this is a "WRITE YOUR RATING HERE" section with a 5-star rating scale and input fields for Name, Mobile, Email, and City. The bottom of the screen shows the Windows taskbar with various pinned icons and the date/time "26-05-2019 20:26".

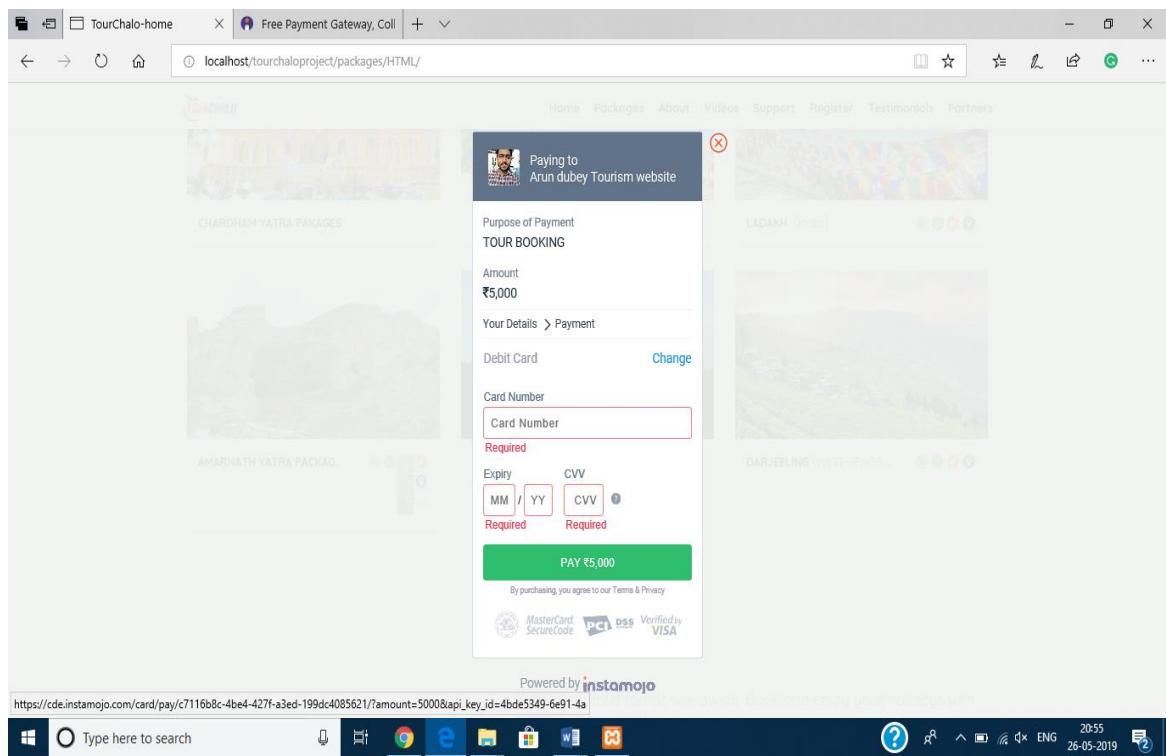

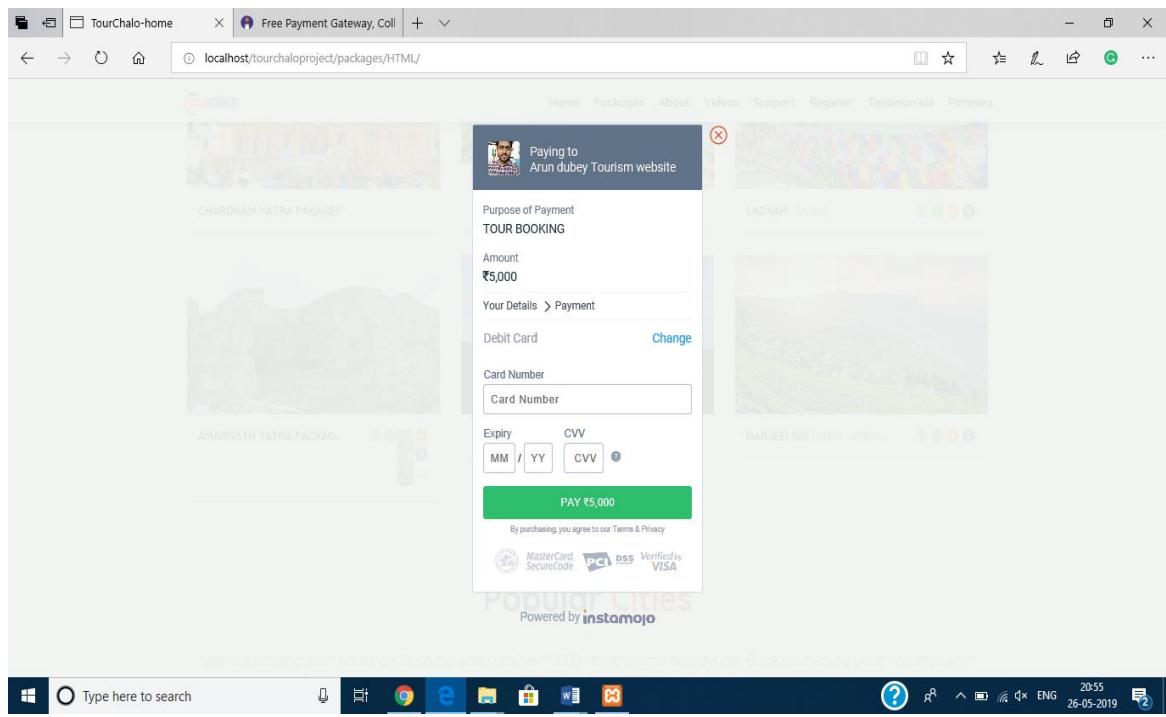

This screenshot shows the same Microsoft Edge browser window as the previous one, but it now displays two customer review cards. The first card is for "Vaishali Kesarwani" from New Delhi, India, who booked a Kailash Manasarovar package. She has a 5-star rating and a message stating she has received great responses to her queries. The second card is for "Rama Kumari" from New York, USA, who also has a 5-star rating and a message about efficient service and guides. The rest of the page structure is identical to the first screenshot, including the header, main content, and taskbar.

The screenshot shows a web browser window with two testimonial cards displayed. The top card is for 'Rama Kumar' from New York, USA, who gave a 5-star rating. The bottom card is for 'Dhermendra Sankar' from Chennai, Tamil Nadu, also giving a 5-star rating. Both cards include a small profile picture, the name, location, rating, and a short testimonial. Below the cards, there are 'TIPS BEFORE TRAVEL' and 'CUSTOMER TESTIMONIALS' sections. The browser's taskbar at the bottom shows various pinned icons and the date/time as 26-05-2019 20:26.

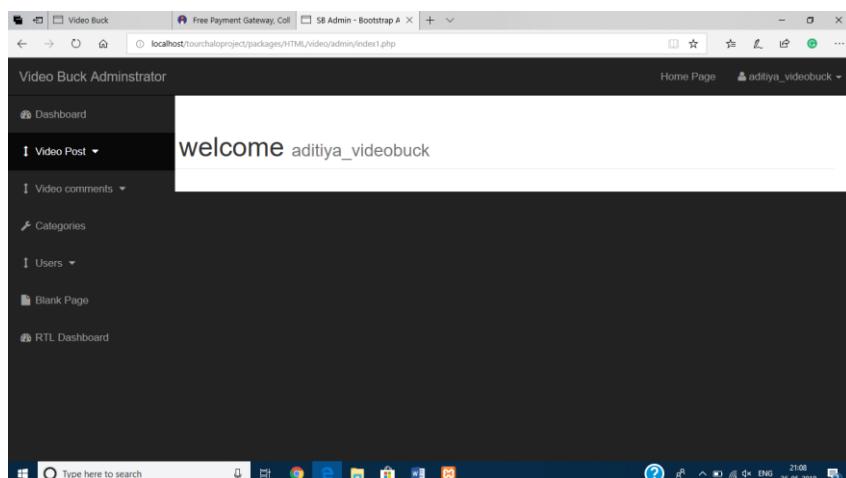

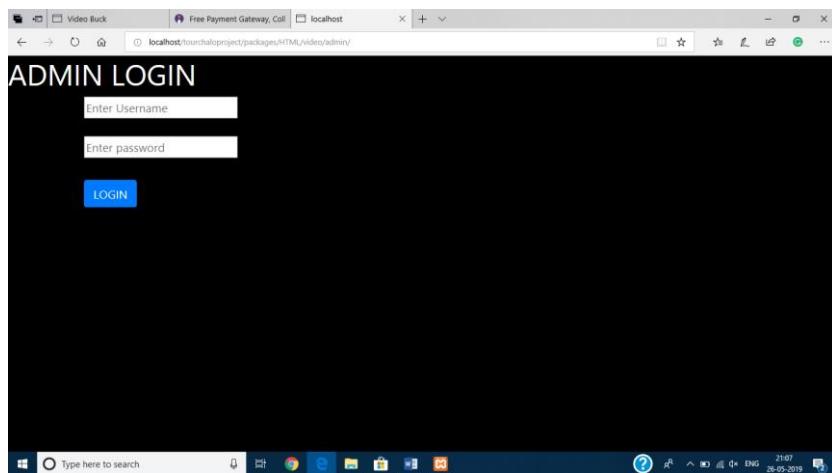

BOOKING PROCESS

The screenshot shows a web browser window displaying a tour booking interface. It starts with a payment gateway header indicating a payment to 'Arun dubey Tourism website'. Below this is a 'TOUR BOOKING' section with a message of thanks and a total amount of ₹5000. A green 'Pay Now' button is prominent. Further down, there are fields for 'Phone Number' and a note that says 'You Pay ₹5,000'. Navigation buttons for 'Next' and 'Back' are visible. The browser's taskbar at the bottom shows various pinned icons and the date/time as 26-05-2019 20:53.

CHAPTER – 5

CONCLUSION & FUTURE SCOPE

5.1 CONCLUSION

- The website proves to increase the business as seen by the vendors.
- The video section is useful in increasing the traffic and enhancing the user experience.
- Use of comments provide facility of taking public opinion without any extra effort and payment enabling the administrator to know the market trends.
- The Awareness and Right Information about any Tour Package is essential for both the client and the middle man organizing the sales.
- A video section proves to be an amazing platform for both travel bloggers and the clients to interact.

5.2 FUTURE SCOPE

- Further other destinations can be added to the website making the website versatile.
- Like feature to the videos can be implemented.
- The feature of replying to a comment can be integrated to the website.
- The feature of subscribing a user can be added to the website.
- The links from other website which serves as a video streaming website other than Youtube can be allowed to be uploaded.
- The website can be integrated to provide a new section that support cookies and provide suggested videos to the user.
- The user profile section can be made more advanced with analytics feature in the website.
- A gateway for payment can be developed of its own to save the extra peny.
- Auto play feature can be included to the website.

5.3 APPLICATIONS

In Tourism industry in order to increase traffic, reliability of the source, establishing a trust between the customers and the vendors. The different features in the website provide facilities for this kind of implementations. The video section can be used as a standalone website to post and share videos and allow users to interact providing a platform of the users to get together for similar kind of interests. The date collected through the session can be used for market analysis and to make business decision in order to generate more profit for the administrator of the company. This website provide a combination of two major sections having specific implementation of their own which makes the website more powerful and functional for use by the general public to select a tour package of their liking and needs.
